Salt Lake City, Utah 84119
(801) 965-4461

MARCH 1990

Once again the Department of Public Safety is pleased to bring the Uniform Crime Report (UCR) in the form of this publication "Crime in Utah." We recognize the efforts on the many criminal justice practitioners who make this report possible. You will notice this report compiles statistical data from seven (7) major categories of crime, mostly felonies. It has been recognized for many years this is not adequate for several reasons:

1) Many more criminal offenses occur than what this report reflects, thus clouding the overall criminal activity that should be made public.

2) Criminal justice agencies depend on this report for budgeting purposes and manpower deployment; therefore the report should be more accurate.

3) There must be timely and accurate data available in this age of automation to assist in stemming the ever rising crime rate in this state and country, to demonstrate the need for added resources and perhaps reform.

To facilitate these needs, the Department of Public Safety, with assistance from the Utah Commission on Criminal and Juvenile Justice, will shortly put into place a new reporting system named "Incident Based Reporting." (IBR) Using computer technology, law enforcement agencies will record incidents as they happen. This information will be transmitted in a timely manner to the State for compilation purposes and to other local agencies if needed to compare specific crimes including suspect descriptions, MO, and other comparable data that may be useful.

This new way of doing business will greatly enhance the reasons we go to this effort putting statistics together in the first place. Hopefully, we can meet the challenge together to make the program work to the good of society.

Sincerely,

D. Douglas Bodrero

D. Douglas Bodrero, Commissioner

1989 SUMMARY ANALYSIS

- There were 93,024 Crime Index Offenses reported during 1989, a 1.3% decrease over 1988
- The largest decrease in reported crime was murder with a 4% decrease followed with robbery 3%, larceny 2%, and burglary 1% decreases.
- While the number of robberies decreased by 3%, the amount of property stolen in those robberies was down by 59%.
- Arson showed an increase of 50% along with rape up 22%, aggravated assault and motor vehicle theft was up 6%.
- 75,883 arrests were made in the state which is a 18% decrease from 1988, of these 33.7% involved juveniles.
- The value of property stolen amounted to $45,865,834. Out of the amount stolen 27% was recovered.
- Of the $13,730,230 stolen motor vehicles, $9,163,220 was recovered.
- Residential burglaries accounted for 67% of all burglaries reported. 36% of these were committed at night.

ACKNOWLEDGEMENTS

This informative book is the product of all the contributing law enforcement agencies in the state of Utah, the Bureau of Criminal Idenfication staff, and the Federal Bureau of Investigation Uniform Crime Reporting Section.

It is with special appreciation to the contributing law enforcement agencies that we give thanks for their extra time, effort, and accuracy in participating in the UCR program.

D. Douglas Bodrero
Commissioner

Rich Townsend
Bureau Chief

Daryl L. Peterson

Uniform Crime Reporting Section

INTRODUCTION

The existence of crime in our state is a concern not only of law enforcement but of our society as a whole. This report presents an overview of criminal activity in Utah in 1989. It is important to keep this report in perspective. It does not represent the overall crime rate in Utah. The report reflects the F.B.I.'s crime index of murder, forcible rape, robbery, aggravated assault, motor vehicle theft, burglary, larceny theft, and arson.

These index crimes are reported by all states giving the nation as a whole a reliable set of statistics to show crime trends in the United States.

INCIDENT BASED REPORTING

Last year, in this book, it was announced that The Bureau of Criminal Identification was starting work on the National Incident Base Reporting System (NIBRS or IBR for short). The IBR project is well under way, thanks to the Commission on Criminal and Juvenile Justice and the Federal Grant monies that B.C.I. has received. IBR is a more accurate way of collecting crime data to show what crime is really happening in Utah. Through IBR the Bureau will be able to develop a statewide administrative, time management, and investigative tool. This tool will allow agencies to make queries to find out what other agencies are having similar problems and who to contact for further information. With your support we will be able to make this a tremendous success with timely information to help you every day. Again B.C.I is looking forward to working with the local agencies as we proceed with the I.B.R. project.

CRIME FACTORS

In order to provide a meaningful statistical profile of crime within the State of Utah, each law enforcement agency must provide the Uniform Crime Reporting Unit with data that depicts specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and therefore, categories of offense classifications used within the state are identical with those of the National System. This results in equitable conclusions being drawn from the data submitted.

Reported Part I offenses and arrests are recorded in the municipality where they occurred regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Fluctuating seasonal population figures are too inaccurate to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size. This would also be indicated in municipalities that experience high population increases due to special events or commuters.

- [ ] Density and size of the community population and the metropoitan areas of which it is a part.
- [ ] Composition of the poulation with reference particularly to age, sex, and race.
- [ ] Economic status, including job availability and mores of the population.
- [ ] Relative stability of poplulation, including commuter, seasonalm, and other transient types.
- [ ] Climate, including seasonal weather conditions.
- [ ] Cultural conditions such as educational, recreational, and religious characteristics.
- [ ] Effective strengh of law enforcement agencies.
- [ ] Administrative and investigative emphasis of law enforcement.
- [ ] Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational.)
- [ ] Crime reporting practices of the general citizenry.
- [ ] Attitudes of the public toward crime reporting.
- [ ] The administrative and investigative efficiency of the local law enforcement agency, including degree of adherance to crime reporting standards.
- [ ] Cooperation of adjoining and overlapping police agencies.

OFFENSE DEFINITIONS

Criminal Homicide:

The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR are excluded from this count.

The killing of another person through gross negligence. Traffic fatalities are not counted.

Rape:

The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit are also included; however, statutory rape (without force) is not counted in this category.

Robbery:

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

Aggravated Assault:

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

Burglary:

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

Larceny/Theft:

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlemnt, "con" games, forgery, and worthless documents. Motor vehicle theft is excluded from this category inasmuch as it is a separate Part I offense.

Motor Vehicle Theft:

The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

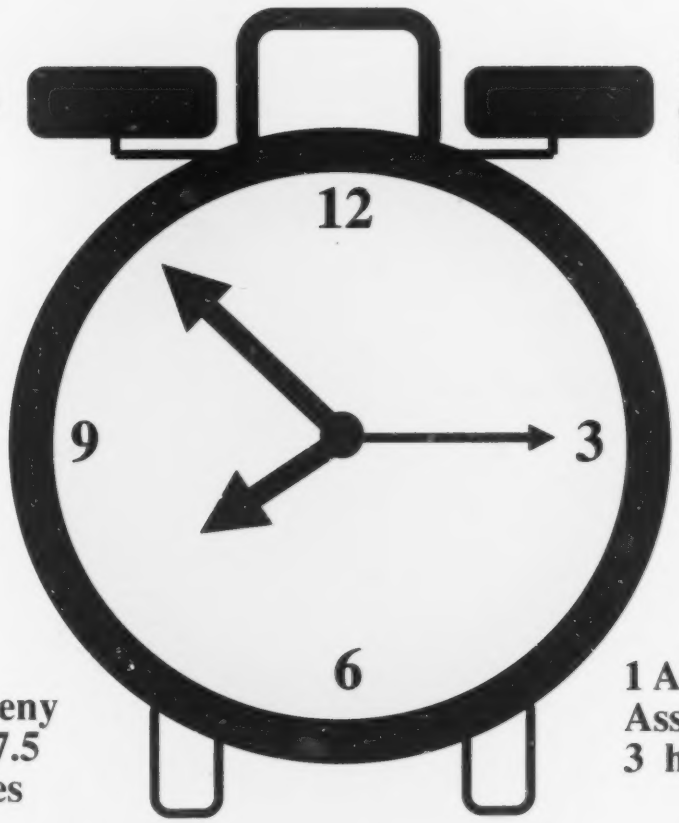
UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

Arson:

The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

UTAH CRIME CLOCK

1 Index Crime every 5.6 minutes



1 Murder every 7.9 days

1 Arson every 18.9 hours

1 Rape every 18.3 hours

1 Auto Theft every 2.2 hours

1 Robbery every 9.9 hours

1 Larceny every 7.5 minutes

1 Aggravated Assault every 3 hours

1 Burglary every 35.8 minutes

CRIME RATES FOR INDEX OFFENSES

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted to terms of rates and percentages.

CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate is the number of Part 1 offenses per 1,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in any city, town, or county.

In computing crime rates by county, population estimates for individual counties were prepared using current census reports.

No attempt has been made to incorporate either transient population or other factors which contribute to the ratio and type of crime in a given area. Any effort to make compaisons of crime rates between one area and another should recognize these population changes and varying environmental factors.

TEN YEAR TRENDS

The UTAH
UNIFORM CRIME REPORTING
Program

In 1978 Utah joined a growing number of states that have adopted Uniform Crime Report as the official statewide Crime Report. The Department of Public Safety has accepted the responsibility to collect, validate and tabulate Uniform Crime Reports from all reporting jurisdictions in Utah.

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics for use in law enforcement, administration, operation, and management. This compiled data is also intended for the use of other professionals and scholars who have an interest in the crime problem, at the same time this information is important as a reference source for the public as an indication of the crime factor in our society.
